New Grass Seed Retail Program

Jewett-Cameron, in North Plains, OR, has announced the addition of Diamond Grass Seed to their extensive product line, which is offered through their MSI division. Diamond Grass Seed is offered both uncoated and coated with their new Dyno-Coat enhanced coating that produces a premium lawn. Diamond Grass Seed uses premium Oregon grown seed and is competitively priced. .

Diamond Grass Seed enhanced coating with Dyno-Coat utilizes Mycorrhizal fungi, which is an environmentally friendly product that will improve coverage, turf and soil quality , rooting and drought resistance.

The benefits of Dyno-Coat with Mycorrhizal fungi:

- **Improved root penetration**
- **Improved fertilizer utilization**
- **Stimulates seed germination & cover during grow-in**
- **Improves tolerance of environmental extremes**
- **Reduces drought stress**
- **Promotes good soil structure and drainage**
- **Reduces watering need**

Diamond Grass Seed is the right seed for your lawn. Selected from premium grass seeds, they offer a seed for nearly any application. From lush lawns to durable sport grasses, Diamond offers quality seeds that are 99.9% weed free.

By simply planting and maintaining a thick, healthy lawn, you are: reducing carbon, lowering heating costs, decreasing runoff, reducing noise and improving water quality. In fact, the better your lawn is maintained, the better it is for the environment.
